about all the possible solutions in our World Expo

Citronics - Belgium - Circular Economy

Citronics makes affordable and circular electronics a reality by transforming discarded smartphones into microcomputers.

Climate Café - United Kingdom - Changing Habits

Climate Café provides an informal space for community interactions to build connections, enhance climate literacy, and foster resilience.

e-Zinc - Canada - Energy

e-Zinc's unique zinc-based long-duration energy storage technology enables 24/7, safe, and cost-effective renewable energy solutions.

Fermentation - Japan - Fashion

Fermentation turns agricultural byproducts into high-value raw materials for cosmetics, food, and industrial applications.

Fermes d'Avenir - France - Land & Agriculture

Fermes d'Avenir promotes regenerative farming by raising awareness of farms addressing environmental, social, and economic issues.

Flamingo - Switzerland - Biodiversity

Flamingo is a pioneering crowdfunding platform dedicated to preserving wetlands, vital for water, biodiversity, and more.

HelioRec - France - Energy

HelioRec provides smart floating solar power plants for the sea, on lakes, or dammed rivers.

Heliosand - France - Circular Economy

Heliosand has invented a solar depollution machine that turns hazardous waste into inert construction materials.

Planet Wild - Germany - Biodiversity

We develop unique rewilding projects around the world. And we turn them into powerful videos that inspire millions.

Preservaland - USA & Brazil - Biodiversity

Preservaland is a digital platform that connects landowners, investors, and conservation projects to conserve biomes.

Soilytix - Germany - Land & Agriculture

Soilytix is a biotech company focused on soil monitoring and predictive analytics to restore ecosystems, and increase yields sustainably.

Wandusoa - Cameroon - Land & Agriculture

Wandusoa trains communities in regenerative agriculture empowering them to improve soil health, increase biodiversity, and enhance yields.
